CELTEC THICK GAUGE

EXPANDED PVC

GAIN A BOLDER PROFILE IN MONUMENTAL SIGNAGE

Celtec® Thick Gauge material offers the print and design communities the flexibility to go bold with creativity while enjoying the same quality and ease of production as our Celtec® Expanded PVC. Available in 32mm and 38mm thicknesses, it provides a commanding base to make images come to life while product formulation and UV performance provide consistency in aesthetics and workability.

Celtec® Thick Gauge is ideal for the most demanding applications, from monument signage and wayfinding, to routed signs, dimensional lettering, indoor and outdoor displays and other applications that require a low-maintenance, high-durability substrate.

Go Bold with Ideas

Using our thicker profile to add strength & visual impact

Enjoy 1-Stop Shopping

With the most complete range of extruded PVC sheet thicknesses available from one manufacturer

Offer Turnkey Solutions

Using matched installation components including posts, wraps & caps for monument signage

Improve Throughput in Finishing

Reduce manual touchpoints with clean cut edges, superior ink adhesion & easy fabrication

Reduce Costs

With our durable, light-weight, low-maintenance signboard solutions
