Vycom® PVC, HDPE, and PP Sheets

TimberTech® Decking

AZEK® Exteriors Trim Boards

All Scrap & Waste is Recycled
& Repurposed in the USA

For questions regarding types of materials recycled,
pick up minimums and frequency, or simply how to get started,
please contact your local Vycom Representative.

WE TAKE SUSTAINABILITY SERIOUSLY.

Plastic waste is a global crisis. As an overwhelming amount of PVC, Acrylic and PE are not properly recovered or recycled, performance plastics are valuable long after their initial usage. In a circular economy, performance plastics can be recycled again and again, eliminating waste and the continual use of resources. As affiliates of the AZEK Company, both Vycom and Return Polymers are proud to not only offer high-quality products made from up to 100% post-consumer and post-industrial recycled materials, we also play an active role in reducing plastic waste through recycling. Through out the AZEK Company we are committed to being good corporate citizens and will continuously explore ways to keep performance plastics out of the waste stream.

HOW RECYCLING WITH VYCOM WORKS

ALL AT NO COST TO YOU!

1 Contact Vycom to Enroll

Contact Vycom today to enroll in the Vycom Recycling Program, which is designed to take back and recycle printed or unprinted rigid PVC, PE and Acrylic sheets, as well as scraps and drops from finishing and fabricating.

2 We Provide Bins & Totes

Once enrolled, we provide you with bulk containers to store your scrap and would be recycled materials.

NOTE: *Keep in mind, recycled materials must be separated by polymer; ie PVC and Acrylic can not be stored in the same bin.*

3 Schedule a Pick-Up

When it's time to schedule a pick-up: **please contact Return Polymers at Recycling@AzekCo.com**, who will coordinate retrieving your scrap after a pick-up date and time is agreed upon. We then replenish your bin stock so the process can continue without interruption.

4 Your Scrap & Waste is Recycled

After collection, your scrap and waste is recycled and repurposed into high quality raw materials used in the production of beautiful, long-lasting, sustainable products.

WHAT YOUR RECYCLED SCRAP MAKES:

- TimberTech Decking
- AZEK Exteriors Trim Boards
- Vycom PVC, HDPE and PP sheets
